

**AVALONIA LAND CONSERVANCY & THE
UNITED STATES FISH & WILDLIFE SERVICE
PROJECT SANDY POINT ISLAND 2009**

Working together in an effort to protect both federally and state endangered nesting birds, Avalonia, USF&WS and Save the Bay located piping plover and oyster catcher nesting sites on Sandy Point and surrounded them with exclosures and/or roped off areas in an effort to protect the parents and chicks until they fledged. We hope that the public will respect all these scientific and educational efforts by leaving their dogs at home and not interfering with the nesting sites.
